Notes:

Reporting period for 2-yearly data is from 1 July 2000 to 30 June 2002

Reporting period for 4-yearly data is from 1 July 1998 to 30 June 2002

2-yearly denominator population is derived from the average of Estimated Resident female Population from 2000 and 2001

1. 4-yearly denominator population is derived from the average of Estimated Resident female Population from 1998, 1999, 2000 and 2001

2. Denominator population was adjusted for age and area specific hysterectomy fractions derived from the 1997 NSW Health Survey data

Data presented are for the age group 20 - 69 years only

*

Where screening number is slightly higher than the population there may be a transient population screened at this postcode

In this specific instance this postcode is Silverwater and consists of industries and therefore the screening rate is higher than the population
